Adjacent-shell corrections expose two exceptionally large reorganizations
A Signed corrections — symmetric-log scale
B Correction magnitudes — log scale
C Signed corrections — symmetric-log scale
D Correction magnitudes — log scale
exceptional
max |Δ|=31.3 MHz
exceptional
max |Δ|=53.8 MHz
exceptional
max |Δ|=53.4 MHz
Signed correction (MHz)
$\varepsilon_J = 0.10$
$\varepsilon_J = 0.11$
Absolute correction (MHz; log scale)
